To Whom It May Concern:

I have used AquaMed dry hydrotherapy equipment in my practice now for several months. I have noticed it has helped my practice in two significant ways.

First, I thought it was just a "feel good" therapy that my patients liked. Then I saw it really did relieve pain and speed healing by reducing muscle spasm and creating circulation better than any other modality I had previously used.

Secondly, because my patients like this therapy so much and they look forward to their next visit, I saw a definite increase in patient retention. If you can retain patients for even an additional two visits, you only have to do the math to see what that means to your practice.

Thank you for bringing AquaMed therapy to our practice.
